Section 3 Agriculture

Agriculture,consist of both growing of crops and rearing of animals.

The Sector is the prominant and dominant economic activity in the region .It is the largest contributor of gross domestic product/GDP/ at regional levels & the main source of food, raw materials for local industries and export earnings. The region endowed with diversified agro-ecology, as aresult the region has a huge potential for production of a variety of agricultural products both for export purpose and domestic consumption. Since the Agricultural sector has great potentials for gearing the whole economy, attention has been given by the government till now. Crop production.

Crop production is the main agricultural activity in the region with the largest share. In this regard, different grain crops (cereals, pulses, oil seeds, fibers, cotton and root crops) & Perennials are grown in different parts of the region based on their agro-climatic suitability condition.In the year 2018/19, the cultivated area has been 4,493,847.15 hectare and the production was 103,102,649.81quintals. In 2018/19 cropping calendar, the region had a contribution of 33.89% in cultivated area & 29.86% in production from the country. The region experiences bi-modal type of rainfall distribution where there is large coverage rainy season “kermit” which encompassing all areas of the region and small rainy season “Belg” which covers the Eastern parts of the region. Even though the lion’s share of the bulk of crop production in the region is during “Meher” season, efforts have being made in Belg season and irrigation agriculture to maximize the total production .

Livestock Development

According to Amhara Livestock development agency by the year 2018/19 region's livestock population covers 26.83% TLU (Tropical Livestock Unit) of the country. the region has cattle 16.14 million ,sheep 11.08 million ,goats 7.76 million and equines 4.12 million population. This resource has great contribution in improving the nutritional status of the people. The production of hide and skin enable to earn hard currency for the economy of the country, for this reason the Regional Livestock promotion agency has to work hard to bring change in this area. The population of livestocck accounts 30.91% of the nationally.
